Anesthesia, Preprosthetic & Dental Implants

Jacksonville, FL | November 12-14, 2021

Purpose:

- **Module 3** focuses on developing the knowledge and skills of the oral and maxillofacial surgeon in the key areas of medical evaluation, outpatient anesthesia, preprosthetic surgery and implant surgery.
- The course is designed to increase the participants' knowledge and skills in patient evaluation and management, anesthetic agents and techniques, management techniques in special populations, evaluation and management of complications, and anesthetic medical emergencies.
- In addition, the participant will learn the techniques and skills necessary to manage a broad range of patients including implant placement in the esthetic zone, posterior and full arch reconstruction, grafting and site development techniques for both soft and hard tissues, and the skills necessary to treatment plan and assist the restorative dentist in their prosthetic rehabilitation.
